Education and Qualifications

Msc Technology and Operations Management

University of Groningen, Netherlands (Sep 2021 - Aug 2022)

Mainly focused on Data Analysis and Programming, Operations Management and Control, Operations Modelling and Simulation. Besides the main focus on optimizing supply chain dynamics using a data analytical approach, I followed courses concerning sustainability, energy transition and innovation. My thesis project involved the implementation and optimization of a carbon capture utilization and storage infrastructure in 6 different European countries, adopting different renewable energy sources.

Bsc Economics & Business Economics

University of Groningen, Netherlands (Sep 2017 - Aug 2022)

Mainly focused on Statistics, Finance, Business, and International Economics. I chose the Economics profile specialization: high-practical and theoretical foundation in Data Analysis, Micro and Macro-economics, Economic Growth, and Strategic Behaviour. A crucial part of the curriculum was devoted to investigating economic research questions using the statistical approach.

Highschool

Scientific Lyceum Guglielmo Oberdan Trieste, Italy (2010 - 2016)

Applied sciences profile - focused on informatics, advanced mathematics, and scientific subjects.

Languages

Mandarin

HSK 4 and Business Chinese - *Le Nuove Vie della Seta Trieste, Italy (2025)*

HSK 1,2,3 - *Groningen Confucius Institute, Netherlands (2022)*

English

Proficiency certificates: TOEFL exam - score: 100+ ; IELTS exam - score: 8 (2025)

Teaching certificates:

TEFL; TESOL; Teach English to Young Learners-*International TEFL Academy (2025)*

Working Experience

Business Development Engineer, Decarbonization Modelling

Wärtsilä Italy, Trieste (Feb 2024-Feb 2026)

Contributed to the development of simulation models that evaluate the feasibility and economic impact of decarbonization retrofit projects, utilizing Python to collect, analyze, and process large datasets for assessing the viability of decarbonization technologies. Delivered technical and economic reports to customers and stakeholders, while implementing structural improvements in workflows and tools to enhance operational efficiency.

Project Purchaser

Wärtsilä Italy, Trieste (Jul 2023 - Feb 2024)

Supported Parts Supply department through market analysis, feasibility studies, and qualification of new propulsion solutions. The major operational tasks involved the use of SAP for the identification and procurement of spare parts from suppliers to storages and/or end users, and the analysis of historical orders data to optimize parts supply process.

Junior Financial Consulting Manager

Diacron Business Consulting Co. Ltd., Shanghai (Dec 2022 - Jun 2023)

A 6-months learning experience based in Asia. While collaborating with an international team of senior managers and consultants, I contributed to several financial and accounting tasks, compiling Excel documents, reviewing financial reports, and interacting with clients and a team Chinese accountants. In addition, I applied my technical programming capabilities to implement an Excel VBA based interface aiming to optimize the overall workflow dedicated to compiling financial reports.

Additional Working Experience

Python Developer

FoliaStream (Currently)

Generated a open-source web app dedicated to the identification of optimal network structures for handling goods within a set of nodes. The first practical implementation has been generating optimal carbon capture and storage network structures at country level. The app is still under development, but its preliminary version can be found here: <https://foliastream.streamlit.app/>.

FoliaNova (Currently)

Designed a publicly available web app that uses worldwide industrial pollution data and forest information to show how much new forest would be needed to offset emissions from any given area or facility. The app is still under development, but its preliminary version can be found here: <https://folianova.streamlit.app/>.

TEFL Architect (Currently)

Designed an open-source web app focused on supporting teachers in their tasks. The tool itself aims to (1) simplify the courses and lessons preparation procedures, (2) provide an online repository where to share teaching material and documentation, and (3) support teachers with interactive tools to be used in-class. The app is still under development, but its preliminary version can be found here: <https://teflarchitect.streamlit.app/>.

Cryogenic Carbon Capture & FSRU Vessels (Currently)

Developed an open-source web app for evaluating the investment case for retrofitting Cryogenic Carbon Capture (CCC) technology onto Floating Storage and Regasification Units (FSRUs), grounded in peer-reviewed thermodynamic research. The app models vessel-specific TCO, NPV, IRR and payback period across EU ETS, FuelEU Maritime, and draft IMO carbon-pricing frameworks, comparing as-is versus retrofit scenarios through 2025. Available at: <https://fsruccc.streamlit.app/>

Assistant

China-Italy Chamber of Commerce – Shanghai (Sep 2022 – Dec 2022)

Contributed to the organization of social events, webinar, and networking activities for more than 750 Italian companies located in China. Besides my primary tasks, I implemented, organized, and structured an Excel database and dedicated search engine.

English teacher

English Teacher – PoPoDoo Center Thanh Mien, Vietnam (Apr 2026–Currently)

Teaching English at PoPoDoo English Center in Thanh Mien town, Hai Phong. I have instructed hundreds of students ranging from 4 to 25 years old. While my work with younger learners focuses on building foundational vocabulary, I also prepare advanced students for Cambridge and IELTS examinations through targeted practice and test-preparation strategies.

Volunteer Viet-Skype(2025)

Served as a volunteer English teacher for this non-profit organization in Vietnam, delivering free lessons to students across various age groups and proficiency levels. Through one-on-one tutoring, I helped learners improve their speaking accuracy, fluency, grammar, and vocabulary.

Project Contributor – Teacher Ethical Debate (Nov 2025-Jan 2026)

Helped coordinate a debate initiative involving multiple Vietnamese students. The program was designed to strengthen participants' debating, speaking, listening, and critical thinking abilities, all while engaging with meaningful ethical topics.

Teacher English Speaking & Listening Extra Course (Feb 2026–Currently)

Currently tutoring 2 classes of Vietnamese students aged between 7 and 14 years old through an English course focused on the development of speaking, writing, listening, and reading skills.
