LANGUAGES

Italian
Native

English
Full professional | IELTS 8, TOEFL 100+

Mandarin
Intermediate | HSK 4

DATA & PROGRAMMING

Python (pandas, optimization)
SQL / PostgreSQL
Excel VBA, Power BI
FICO Xpress, Gurobi
R, STATA
Git

WEB & IT

Streamlit
REST APIs
React / Vite
Database design
Cloud deploy (Render, Neon)

BUSINESS

Techno-economic analysis
TCO, NPV, IRR, payback
Business development
Supply chain and SAP
Client reporting

PROFILE

Data analyst and techno-economic modeller with 3 years of industry experience at Wärtsilä, turning large operational datasets into investment decisions for clients. Strong Python and optimization background (MSc, University of Groningen) with full-stack skills (SQL, APIs, React) shown through several deployed open-source web apps. Experience in Europe and Asia.

PROFESSIONAL EXPERIENCE

Business Development Engineer, Decarbonization Modelling
Wärtsilä Italy, Trieste | Feb 2024 - Feb 2026

- Developed simulation models evaluating feasibility and economic impact of decarbonization retrofit projects.
- Collected, cleaned and analysed large vessel-operations datasets in Python to assess technology viability.
- Delivered technical and economic reports to customers and stakeholders to support investment decisions.
- Improved team workflows and internal tools to increase operational efficiency.

Project Purchaser
Wärtsilä Italy, Trieste | Jul 2023 - Feb 2024

- Market analysis, feasibility studies and qualification of new propulsion solutions for Parts Supply.
- Used SAP and historical order data to optimize spare-parts procurement.

Junior Financial Consulting Manager
Diacron Business Consulting, Shanghai | Dec 2022 - Jun 2023

- Compiled and reviewed financial reports; worked with clients and a Chinese accounting team.
- Built an Excel VBA interface that streamlined financial-report compilation.

Assistant
China-Italy Chamber of Commerce, Shanghai | Sep 2022 - Dec 2022

- Supported events and networking for 750+ Italian companies in China; built an Excel database with search tool.

DATA & SOFTWARE PROJECTS

FantaLeague | full-stack application
fantaleague.onrender.com

- Database, Python API and React/Vite frontend, deployed on Render.

Cryogenic Carbon Capture on FSRU Vessels
fsruccc.streamlit.app

- Investment model for retrofitting cryogenic carbon capture on FSRUs: TCO, NPV, IRR and payback under EU ETS, FuelEU Maritime and draft IMO carbon pricing.

FoliaStream
foliastream.streamlit.app

- Finds optimal network structures for moving goods between nodes; first use case: country-level CCS networks.

FoliaNova
folianova.streamlit.app

- Uses global pollution and forest data to estimate the forest needed to offset emissions of any area or facility.

EDUCATION

MSc Technology and Operations Management
University of Groningen, Netherlands | Sep 2021 - Aug 2022
Data analysis and programming, operations modelling and simulation, energy transition. Thesis: optimization of a CCUS infrastructure across 6 European countries with different renewable energy sources.

BSc Economics & Business Economics
University of Groningen, Netherlands | Sep 2017 - Aug 2022
Econometrics profile: statistics, finance, micro/macro-economics, applied economic research.

ADDITIONAL EXPERIENCE

- **English Teacher**, PoPoDoo English Center, Hai Phong (Apr 2026 - present): Cambridge/IELTS preparation, ages 4 to 25.
- Volunteer English teacher (Viet-Skype, 2025); Teacher Ethical Debate contributor (2025-26); TEFL / TESOL certified (2025).
